CAREER OBJECTIVE

IT graduate seeking an entry-level position in software development or technical support where I can apply my skills in web development, system troubleshooting, and database management.

ON-THE-JOB TRAINING

IT Support Intern | *Alturas Group of Companies*

2025-2026

- Resolved client-reported technical issues through phone support and troubleshooting, improving response time and user satisfaction.
- Diagnosed and repaired hardware and software problems on desktop systems and network devices, ensuring continuous and efficient business operations.
- Installed, configured, and troubleshooted computers, printers, CCTV systems, and access control devices, enhancing system reliability and operational functionality.
- Maintained LAN connectivity, performed basic network troubleshooting, and organized cable management, resulting in improved network stability and a safer workspace.
- Monitored system performance and supported daily IT operations, reducing downtime and maintaining overall system efficiency.

TECHNICAL SKILLS

Languages: PHP, JavaScript, Java

Frontend: HTML, CSS, Bootstrap, Vue.js, Inertia.js

Backend: Laravel (PHP Framework)

Databases: MySQL, SQL

Tools: XAMPP, Git/GitHub, Figma, VS Code

IT & Hardware: Computer Assembly, Troubleshooting, Peripheral Setup, CCTV Installation, Networking Basics

PROJECTS

Inventory Management System — *Laravel · Inertia.js · Vue.js · MySQL*

- Designed and deployed a live inventory system used by Calape, Bohol — accessible at res.calapebohol.com
- Built a modal-based borrowing workflow where users submit quantity, return date, and personal information.
- Created an admin panel to approve or decline borrow requests and track item status in real time.

Gym Log Management System — *Laravel · Inertia.js · Vue.js · MySQL*

- Built a full-stack web application for gym staff and members.
- Implemented attendance tracking, membership management, and session logging.
- Developed full CRUD operations for both user and admin interfaces.
